

glaucoma

To Help Prevent Vision Loss & Manage Glaucoma

1 Have a complete eye examination once every 2 years

2 Know your eye pressure and monitor any changes

3 Take your medication as your doctor instructs

4 Know your risk factors for Glaucoma¹

- Over the age of 45 years
- Family History of Glaucoma
- Marked Nearsightedness
- High Intraocular pressure (IOP)
- African, Asian or Hispanic heritage

5 Visit an eye doctor to ensure your eye condition is identified early and appropriately managed
