

Virtual Global Retinal  
Network Program

# SAVE THE DATE

**A vision for retinal disease care:  
The patient in focus**

Dear colleagues,

The virtual Global Retinal Network Program (GRNP) series continues in 2021! Following the success of the virtual GRNP meetings in 2020, the GRNP team is pleased to invite you to the virtual GRNP Germany & Europe 2021 meeting on Saturday, June 12, 2021.

Join our distinguished faculty of specialists for an interactive program addressing key aspects of managing patients with retinal diseases. The experts will focus on how to achieve clinically meaningful outcomes in patients with nAMD and vascular diseases, stimulating lively discussions on how to implement current recommendations in daily clinical practice and the importance of ensuring appropriate treatment. You will have opportunities to ask questions throughout.

We hope you will join us for what will be an informative and engaging program addressing key topics in ophthalmology. We look forward to seeing you in June!

Kind regards,

The GRNP team,  
Prof. Dr. med. Nicole Eter and  
Prof. Dr. med. Horst Helbig

nAMD, neovascular age-related macular degeneration.  
The Global Retinal Network Program is a scientific educational initiative. CME credits will be applied for.

This stand-alone meeting is organized and funded by Bayer. April 2021
