OPHTHALMOLOGY

THE DIGITAL OPHTHALMIC STUDENT

Explore how technology can enhance the learning experience of students in ophthalmic education.

UCL/Moorfields Learning and Teaching Symposium

What is on the horizon in the next five years in terms of education technology that can be customised for ophthalmic education? What are the critical challenges that we face and how can technology assist us in developing our workforce to meet these challenges? What are the trends and technological developments that will drive change in ophthalmology and how can we better educate our students for these changes?

Come learn about best practices in ophthalmic education – designing the virtual ophthalmic space, gamification for teaching effectiveness, blended learning, mixed reality and blockchain.

20 September 2019 | 9.00am - 4.00pm
UCL Institute of Ophthalmology, 11-43 Bath Street, London EC1V 9EL
